

Sew You Think You Can Draw?

An Occupational Therapist Led Group Program

Our Paediatric Occupational Therapist will provide a specialised individual - tailored group, designed around individual goals that aims to:

- Increase awareness of effective social skills
- Facilitate team work by coming together to create a HUGE collaborative piece of art
- Promote flexible thinking by having to compromise and negotiate ideas within a group setting
- Practice reflective listening
- Practice encouraging others
- Nurtures forward planning, time management and organisational skills
- Embraces creative thinking
- Improves motor skills and coordination
- Express feelings that may be difficult to verbalise.

Our Art Group emphasizes creative problem solving, promotes flexible thinking and teaches teamwork through coming up with a group-based project which will feature in our Lime Legends Clinic as well as individual art projects which you will be able to take home with you.

Participants can be children through to young adults who want to get creative, build social skills and have FUN.

Our skilled Paediatric Occupational Therapist will allocate participants into groups according to school year level, maturity and goals.
